

I am writing to comment on the proposal to allow Low Power FM stations to take priority over current FM translator services. In particular, I am referring to K-LOVE, a national and regional broadcaster with many local FM translators. This broadcaster is an enormous asset to the community where I live. It provides encouraging, inspirational programming that is a stark contrast to the majority of FM content. I personally listen to it over 8 hours a day.

The impact to my community would be substantial and detrimental should this LPFM proposal be allowed. There are very few broadcasters offering such positive and encouraging content and to remove it would leave a huge moral void in FM content locally. I believe that the KLOVE broadcast serves the public interest in a great way by providing this content. In addition, the fact that this broadcast does not rely upon advertising, but upon listener donations, shows the ground support from the community offered to KLOVE.

I appreciate your consideration.

Sincerely,

Nathan Gibson
